REASONS FOR ALLOWANCE

5. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including "a field that is a foreign key to its relationship type; and a set of property fields containing information about one or more of the attributes of the relationship, wherein the components are stored in a schema, wherein property definitions of each component are linked to a type of component, wherein changes made to the type of component are automatically associated with all components of that type of component without changing the schema to reflect a corresponding change in the arbitrarily complex environment, wherein the schema is implemented in a database, wherein the query is a component query or a relationship query; searching the applied data model to the arbitrary level based on the set of statements translated from the query, wherein the query is in a first query language, and wherein the set of statements is capable of execution by a database management system supporting a second query language, wherein the database management system is associated with the database; producing a set of replies to the set of statements, wherein the set of replies includes at least one component or one relationship at the arbitrary level; and processing the set of replies according to the query" as recited in independent claim 1 and similarly recited in independent claims 12 and 23.

The remaining claims are dependent claims, thus these claims are patently distinct over the art of record for at least the above reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
